

CONSTRUCTION STANDARDS

SECTION CS 11

EXISTING UTILITES

CS 11-01 The Contractor shall work around and protect all utility, service, or other lines that may be encountered during the course of work.

When any existing utility, service, or other line is encountered and conflicts with construction in accordance with the Project Plans, the Contractor shall schedule his work and coordinate with the Design Engineer to either have the utility relocated by the owner, or have the Design Engineer redesign the location of the facility being installed by the Contractor. The decision to either relocate the existing utility or redesign the facility being installed will be made by the Director of Public Works based upon a supplemental design submittal. The supplemental design submittal shall be developed and presented by the Design Engineer and shall consist of the actual site conditions and possible solutions. For private development projects, the Design Engineer shall submit the supplemental design submittal to the City Engineer for review and approval by the Director of Public Works.

The Contractor shall contact Underground Service Alert (USA) at telephone number 1-800-227-2600 a minimum of 48 hours prior to performing any excavation.
